

# Quathera Product Brief

## AI-Powered Web Form Testing Platform

### The Problem

Traditional test automation costs \$450K-\$750K annually, takes 3-6 months to set up, and 80% of test failures are from broken locators, not real bugs.

### The Solution

Quathera eliminates manual test automation entirely with AI that discovers, maps, generates, and self-heals tests automatically.

### Key Capabilities

- AI Form Discovery - finds every form automatically
- Intelligent Form Mapping - deep field analysis
- Multi-Environment Test Sites - QA/Staging/Production
- Auto Test Generation - complete CRUD cycles
- Self-Healing Tests - auto-fix broken locators
- Visual Verification - catch UI issues automatically
- Spec vs Discovery - detect undocumented changes
- Test Coverage Matrix - track quality by version
- Smart Jira Integration - auto-create bugs
- Dual View Logs - Agent + Web App visibility

### ROI Impact

Setup: 30 minutes vs 3-6 months. Maintenance: Near zero vs 40% of QA time. Coverage: 95%+ vs 60-70%. Typical savings: \$300K-\$500K annually.

### Pricing

Free Trial: \$0/14 days | Starter: \$300/month | Professional: \$500/month | Enterprise: Custom
